THE LEADERSHIP JOURNEY

Applying Fundamental Leadership Principles

Leadership Makes A Difference

Leadership is not a destination; it is a unique journey that evolves as we serve in various roles throughout our lifetime.

This one-day workshop will guide participants toward a deeper understanding of the many facets of leadership which is both an "ART" and a "SCIENCE".

This workshop will explore evolving trends in leadership and ways to adapt in an increasingly complex technological world. It examines differences between management and leadership. It explores leadership styles and how we can best work within four leadership domains. Evidence is presented about the importance of building our leadership journey on a solid foundation based on core values.

Presenter:
Pat Bolger, MSc, BSc, CEA
37 years leadership and management experience in industry, government and consulting.
